DETAILED ACTION

Amendment

The amendment filed on 08 November 2007 has been entered into this application.

Response to Arguments

Applicant's arguments/remarks, see pages 9-11, filed on 08 November 2007, with respect to the rejection(s) or objection of claim(s) 1-3, 6-8, 10-11 and 14-16 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Allowable Subject Matter

Claims 1-22 are allowable

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a space separation mechanism which is provided in the vicinity of an optical focal plane toward the pattern formed surface of the substrate, and spatially separates an irradiation area of the first inspection light and the second inspection light such that the transmitted light through the substrate is imaged in one area on the optical focal plane separated from another area where the reflected light from the substrate is imaged, in combination with the rest of the limitations of the claim. Claims 2-8 are allowable by virtue of their dependency.

As to claim 9, the prior art of record, taken alone or in combination, fails to disclose or render obvious a space separation mechanism which is provided in the vicinity of an optical focal plane between the pattern formed surface of the substrate and the first detection sensor and the second detection sensor, and spatially separates the transmitted light through the

substrate and the reflected light from the substrate such that the transmitted light is imaged in one area on the optical focal plane separated from another area where the reflected light is imaged, in combination with the rest of the limitations of the claim. Claims 10-16 are allowable by virtue of their dependency.

As to claims 17-22, the examiner's statement of reasons for allowance is indicated in the previous Official Action dated September 13, 2007.
